***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19, 32-34, 37, & 40-44 (brightness enhancement film) drawn to light modifier having plural tapered structure, classified in class 362, subclass 317.
  - II. Claims 20-30, 35, 37, & 45-46 (an illumination system) drawn to edge lighted panel having light modifier with emission face combined with light guide plate, classified in class 362, subclass 606.
  - III. Claims 31, 36, (display apparatus) drawn to edge lighted panel including liquid crystal display, classified in class 362, subclass 561
  - IV. Claims 38 & 39 (an illumination apparatus) drawn to light source (or support therefor) and modifier, classified in class 362, subclass 257

The inventions are distinct, each from the other because of the following reasons:

Inventions II, III, IV, and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Group I is brightness enhancement film that modify light rays, Group II is an illumination system having lighted panel with light modifier, Group III is display apparatus having edge lighted panel combined LCD and Group IV is an illumination apparatus having general light source combined with a modifier.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
